Order Note

1. Please note power supply, accuracy, relay quantity; the default is 24VDC power supply, accuracy 0.5%FS and no relay control;
2. If the user needs communication software and instruction for RS485 interface, please note in the order;
3. Flush diaphragm product's pressure range 0~70kPa...35MPa;
4. The user who needs MPM460W, please install product as MPM416W/426W operation manual; we can provide fixed flange for the user;
5. For MDM460 product, please pay attention to overpressure of positive and negative cavity should be suitable to max. Pressure; we suggest to install tri-valve between measured point and transmitter to make pressure ading on positive and negative cavity slowly.
