

MPM281 High Stability Pressure Sensor

Features

- Pressure range -100kPa...0kPa~7kPa...100MPa
- Gauge, Absolute, Sealed gauge, Vacuum
- Constant current or constant voltage power supply
- Silicone/Fluorocarbon oil filling options, isolated construction, excellent medium compatibility
- Ø19mm standard OEM pressure sensor
- Full stainless steel 316L
- Wide temp. compensation range -10°C ~80°C
- Long-term stability ± 0.1%FS/Year

Applications

- Industrial process control
- Level measurement
- Gas, liquid pressure measurement
- Pressure gauge
- Pressure calibrator
- Hydraulic system and switches
- HVAC system
- Aviation and navigation inspection

Introduction

MPM281 High Stability Pressure Sensor is a silicon piezoresistive sensitive element with isolated construction and temperature compensation. The sensor uses a high-reliability diffused silicon die encapsulated in a Ø19mm 316L stainless steel housing. Precision compensation provides a wide temperature range and zero-point calibration. The measured pressure is accurately converted to an electrical signal via an isolated diaphragm. Fluorocarbon oil filling is available. It is tailored for pressure measurement in oxygen-rich conditions. MPM281 Pressure Sensor undergoes rigorous inspection and testing on the automated production line, suitable for demanding pressure measurement conditions.

Electrical Performance

- Power supply: ≤2.0mA DC (constant current type)
≤10V DC (constant voltage type, on request)
- Electrical connection: Ø0.5mm Kovar pin or 100mm silicone wires
- Common mode voltage output: 50% input (typ.)
- Input impedance: 2kΩ ~ 8kΩ (constant current type)
4kΩ ~ 25kΩ (constant voltage type)
- Output impedance: 3.5kΩ ~ 6kΩ
- Response time (10%~90%): <1ms

Construction Performance

- Diaphragm: Stainless steel 316L
- Housing: Stainless steel 316L
- Vent tube : Stainless steel 304
- Pin: Gold-plated kovar
- O-ring: FKM
- Net weight: ~16g
- Oil filling: Silicone oil (default)/Fluorocarbon oil

Environmental Conditions

- Vibration: No change at 10gRMS, (20~2000)Hz
- Shock: 100g,11ms
- Medium compatibility: The gas or liquid which is compatible with stainless steel and FKM

Basic Conditions

- Medium temperature: (35±1)°C
- Ambient temperature: (35±1)°C
- Vibration: 0.1g (1m/s²) Max
- Relative humidity: (50±10)%RH
- Ambient pressure: (86~106)kPa
- Power supply: (1.5±0.0015)mA DC

All specifications were tested under basic conditions.

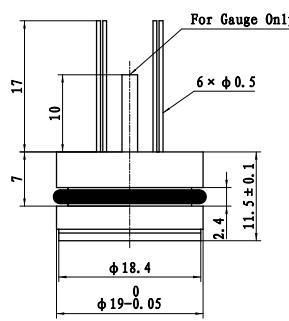

Item	Min.	Typ.	Max.	Units	Notes
Pressure nonlinearity		±0.15	±0.2	%FS,BFSL	1
Pressure repeatability		±0.03	±0.075	%FS	
Pressure hysteresis		±0.03	±0.075	%FS	
Zero output		±1.0	±2.0	mV DC	
Constant current output/span	70			mV DC	2
Constant voltage output/span	5		25	mV/V	3
Zero thermal error		±0.5	±1.0	%FS,@35°C	4
Span thermal error		±0.5	±1.0	%FS,@35°C	
Compensation temp. range	0~70		°C (≤35kPa)		
	-10~80		°C (>35kPa)		
Long-term stability error		±0.15	±0.20	%FS/Year(≤100kPa)	
		±0.10	±0.15	%FS/Year(>100kPa)	
Zero thermal hysteresis	±0.2		%FS (≤100kPa)		5
	±0.15		%FS (>100kPa)		
Insulation resistance	250		MΩ@250V DC		6
Lifetime	≥10 million		cycles		
Operating temp. range	-40~125		°C		
Storage temp. range	-40~125		°C		

1. P=35kPa, nonlinearity ≤±0.3%FS
 2. Output/Span=full scale output - zero point
 P=7kPa, output/span ≥45mV, P=0.7bar, output/span ≥60mV
 3. P=7kPa, output /span 3mV/V ~ 6mV/V
 4. P=7kPa, zero thermal error≤1.5%FS
 5. Within compensation temp. range
 6. Insulation resistance was tested under RH≤65% and Temp.≤35 °C .

Outline Construction

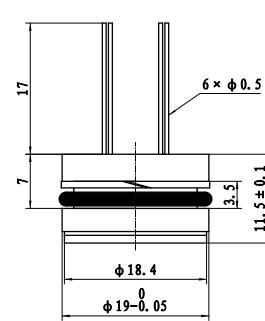

(Unit: mm)

MPM281 Type

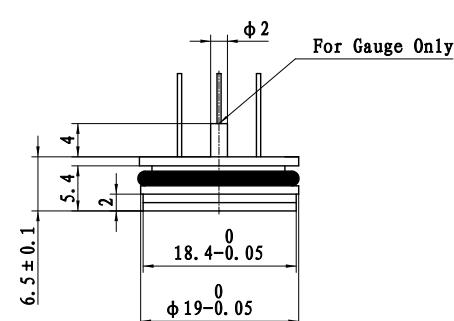

P < 3.5 MPa

MPM281 Type II

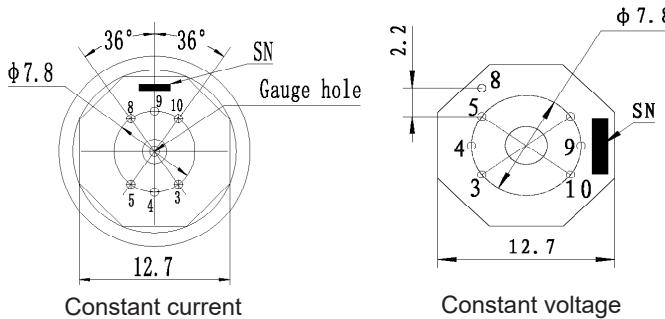

P > 7 MPa

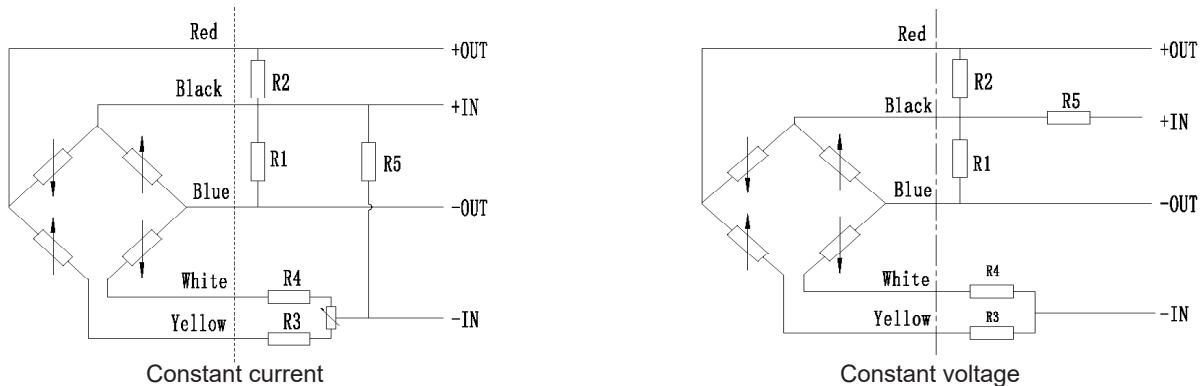

20 kPa < P < 3.5 MPa

The recommended installation dimension is Φ19^{+0.05}_{+0.02} mm

S	Sealed gauge
GY0	Withstand vacuum pressure while Zero at atmospheric pressure
GY	Withstand vacuum pressure while Zero at -100kPa

Notes

1. The default unit of the product is kPa. 1kPa=0.01bar.
2. Zero shift: Range code 0B can be shifted to -5kPa, -10kPa or -20kPa; 0A can be shifted to -10kPa or -20kPa; 02 can be shifted to -35kPa, -50kPa, or -70kPa; 03~13 can be shifted to -100kPa.
3. It is recommended that the sensor be assembled as a "suspended" construction to avoid direct pressure on its face and affecting sensor stability.
4. Protect the isolated diaphragm and ceramic circuit board to prevent any damage or low performance.
5. The FKM O-ring of sensor has a temperature range of -20°C~250°C by default. For operating temperature below -20°C or harsh media, please contact the MICROSENSOR.

MPM281Pro Pressure Sensor

Features

- Pressure range: 0kPa ~7kPa...3.5MPa
- Nonlinearity: $\pm 0.1\%$ FS
- Gauge, Absolute
- Constant current power supply
- $\Phi 19\text{mm}$ standard OEM pressure sensor
- Full Stainless Steel 316L
- Wide compensation temperature range of -20°C ~85°C
- Long-term stability: $\pm 0.1\%$ FS/Year
- 3.012V $\pm 1\%$ Interchangeability (gain resistance)

Applications

- Medical devices
- Industrial process control
- Level measurement
- Air refrigeration or compressors
- Pressure transmitters
- Hydraulic system and switches

Introduction

MPM281Pro Pressure Sensor is a high-accuracy, medium-isolated pressure sensitive element, utilizing a highly stable and reliable diffused silicon die that is encapsulated in a 316L stainless steel structure with an outer diameter of $\Phi 19\text{mm}$. Accurate tuning of temperature error and zero output is achieved through an external laser trimming compensation board. Additionally, the gain resistance can be adjusted to provide a net FS output signal of 3.012V $\pm 1\%$.

This product has undergone strict inspection, repeated assessment, and testing on automated production lines. It can be widely used in various high-demand pressure measurement applications.

Electrical Performance

- Power supply: $\leq 2.0\text{mA DC}$
- Electrical connection: Grey ribbon cable with plug(UL2651-6P,28AWG,2451HM-6P)
- Common mode voltage output: 50% input (typ.)
- Input impedance: $2\text{k}\Omega \sim 8\text{k}\Omega$
- Output impedance: $3\text{k}\Omega \sim 6\text{k}\Omega$
- Response time (10%~90%): <1ms
- Insulation resistance: $100\text{M}\Omega @ 100\text{V DC}$
- Overpressure: 2 times FS

Construction Performance

- Diaphragm: Stainless steel 316L
- Housing: Stainless steel 316L
- Vent tube : Kovar alloy
- Outline: Ribbon cable
- O-ring: FKM
- Net weight: About 16g
- Oil filling: Silicone oil

Basic Conditions

- Medium temperature: $(25\pm 1)^\circ\text{C}$
- Ambient temperature: $(25\pm 1)^\circ\text{C}$
- Vibration: 0.1g (1m/s²) Max
- Humidity: $(50\pm 10)\% \text{RH}$
- Ambient pressure: (86~106) kPa
- Power supply: $(1.5\pm 0.0015) \text{ mA DC}$

Environmental Conditions

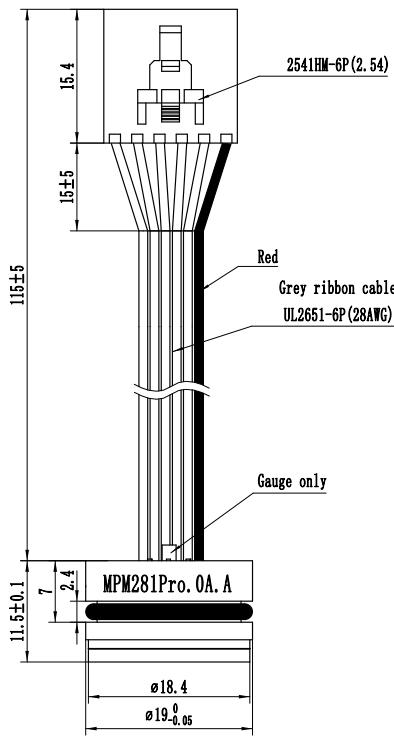

- Vibration: No change at 10gRMS, (20~2000)Hz
- Shock: 100g,11ms
- Medium compatibility: The gas or liquid which is compatible with stainless steel and FKM

Item*	Typ.	Max.	Range	Unit
